EDUCATION

Bachelor of Commerce, Business Technology Management CO-OP

September 2020 - May 2025

Ted Rogers School of Management, Toronto Metropolitan University

EXPERIENCE

Experienced Associate, Cyber Security Risk (CO-OP), *PricewaterhouseCoopers (PwC)* May 2024 – August 2024

- Directly supported over 10 clients in various industries, including transportation, mining, and finance, to successfully implements cyber-security frameworks such as ISO27001, ISO27017, and NIST CSF.
- Worked cross functionally with internal teams and industry leaders to deliver in-depth cyber security maturity assessments against industry benchmarks to clients, providing key insights to improve their security posture.
- Developed a skill assessment process for team leadership to assess team competencies and assign appropriate training and certifications, driving forward PwC's commitment to upskilling and continuous learning.

Associate, Digital Risk Solutions (CO-OP), *PricewaterhouseCoopers (PwC)* September 2023 - December 2023

- Involved in, and eventually led, client walkthroughs, project status meetings, and monthly management meetings, to deliver information on key challenges, risks, and next steps, improving efficiency in engagements.

Product Management Consultant (CO-OP), *Avenue Code*

June 2023 – September 2023

Avenue Code is a San Francisco based IT and Digital Transformation consulting company.

- Conducted user research, client consultations, and product development process analysis to write detailed user stories, streamline processes, and expedite feature delivery, enhancing value for over 1000 users and customers.
- Analyzed product development processes to identify gaps, spearheading the project to implement a Unit Testing framework, using project management skills to improve product quality and establish a rigid QA practice.
- Engaged in high-level strategic meetings with C-level executives to define quarterly product roadmaps and prioritize features, aligning development efforts and resources with company goals and customer needs.

Systems Analyst (CO-OP), *Abbott Laboratories*

May 2022 - December 2022

- Improved data gathering automation and processes in over 70 clinical sites, integrating diagnostics, risk compliance, and data surveillance to provide reports and Electronic Data Capture capabilities for analysis.
- Communicated effectively with stakeholders to gather functional and user requirements while using written communication to precisely document and implement a SaaS-based Electronic Trial Master File (eTMF).
- Contributed towards team success using Azure DevOps for Agile Project Management, being awarded 2nd place in Abbott's Innovation Day for integrating cloud solutions such as AWS (S3 and CloudWatch) and Docker.
